

KLARI-ONE 1000V

with: I-PROBE, U-PROBE, I/U-PROBE, , Thermocouple type K -PROBE

also with analogue output

Features

- one channel measuring module for current, voltage or combination current/voltage (Combi-PROBE I/U) and temperature measurement
- galvanic isolation of 1000 V DC between measuring channel and data output
- **PROBE variants:**
 - current measurement HV-I-PROBE
 - voltage measurement HV-U-PROBE
 - Combi-PROBE for current- and voltage measurement HV-I/U-PROBE
 - thermocouple type-K HV-T-PROBE
- **Configuration of measurement channels:**
 - DC- and AC-measurement, internal sample rate up to 16 kHz
 - AC measurement provides the opportunity of calculating RMS-value for one period automatically and transmitting it as a single value via CAN-interface
 - additionally the frequency of the period can be issued
 - following values can be calculated internal and transmitted via CAN-interface:
 - U_{eff}
 - I_{eff}

Version

- potted housing: 78/64/46 (l/w/h), standard-version
78/78/46 (l/w/h), analogue-version
- protection class IP65,
- temperature range -40...+85 °C
- supply 6..50 V DC

A detailed technical description is contained in our user manual.

Delivery

- measurement module (please order PROBES separately),
- PC Software for configuration via CAN or USB-2.0 interface
- CAN database and documentation on CD ROM

Accessories

- cable harness IP65 without RS-232
- USB 2.0 connection cable

KLARI-ONE 1000V
