

# KLARI-ELAST

## Features

- Measuring unit for testing batteries using following functions:
  - Charge, discharge and cycle (charge/discharge)
- The measured values current, voltage and charge-/discharge-balance can be transmitted via CAN-interface and /or stored on an integrated SD card.
- **Charging:** The charging process is executed by an external charging unit.
  - Configuration:
    - charging current: min./max.value
    - charging voltage: min./max. value
    - Ah-charging: selectable
    - Charging time: selectable
- **Discharging:** The discharging process of the battery is performed by the integrated ELAST-unit.
  - Configuration:
    - Discharging mode: static (constant current) or PWM-load (pulse width modulation)
    - External: on/off
    - U-load: selectable (when threshold is exceeded discharging stops)
  - Static ( I - constant current between 10mA...50A )
    - I-constant: discharging current, selectable
    - discharging time: selectable
    - Ah-discharging: selectable

} 2 parameters are selected, 3rd parameter is calculated
  - PWM load ( I - pulse, pulse width modulation )
    - I-load 1 : discharge current, selectable
    - I-load 2: discharge current, selectable
    - time-on: time period of I-load 1, selectable
    - time-period: duration of one period, selectable
    - time: duration of complete measurement, selectable

} time-period - time-on(I-load 1) = time-on(I-load 2)
- Following values are supervised during discharging process:
  - I\_batt min./max. if overstepped or undercutted, switch-off
  - U\_batt min. if undercutted, switch-off
  - U\_batt max. has to accord with the utilized battery
  - U-load if limit value is crossed discharging stops
- The discharging process will be finished if:
  - U\_batt min value is reached,
  - U-load value is reached,
  - Ah-value is reached,
  - I\_Batt min value is reached
  - discharging time is reached.
- **Cycle:** passing charging-/discharging-cycles:
  - Configuration:
    - n-charging: selectable
    - n-discharging: selectable

# KLARI-ELAST

- Version**
- plastic- aluminium-housing, 465/390/245 mm (l/w/h)
  - protection class IP54,
  - temperature range -20...+50°C
  - supply 230 V AC, current consumption approx. 2 A

A detailed technical description is contained in our user manual

- Delivery**
- Measuring unit
  - battery connection cable with 2 DINSE pole plugs
  - 2 DINSE pole plugs with copper sticks, Ø 6mm (connecting external charging unit)
  - PC software for configuration via CAN or USB-2.0 interface
  - CAN database and documentation on CD ROM
  - USB 2.0 connection cable
  - **Using KlariViewer-software logged data can be displayed and processed further.**

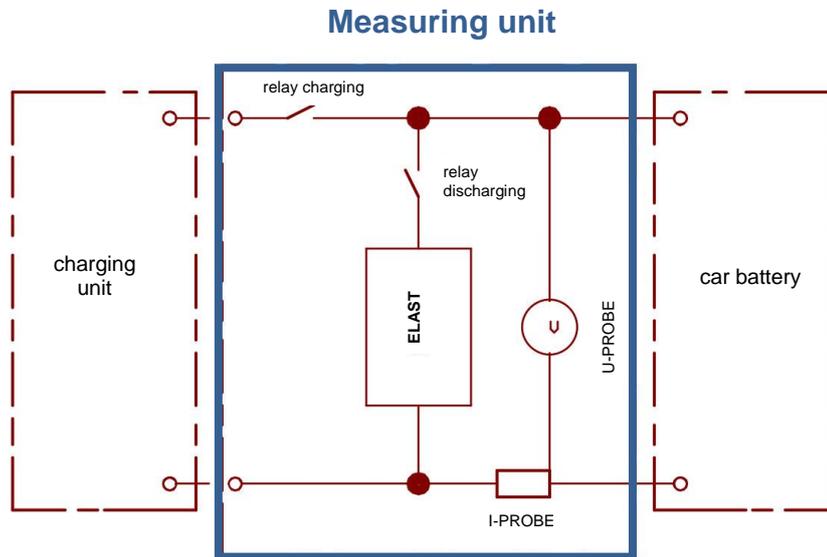

- Accessories**
- battery connection cable with 2 DINSE pole plugs
  - 2 DINSE pole plugs with copper sticks, Ø 6mm

## TECHNICAL DATA

<b>Input</b>	<ul style="list-style-type: none"> <li>• 2 internal measuring channels with 2 ASICs             <ul style="list-style-type: none"> <li>- 1 x current-PROBE (1mΩ)</li> <li>- 1 x voltage-PROBE (80 V)</li> </ul> </li> </ul>
